

CASE STUDY

PROJECT DETAILS

T155 - IRON ORE CAR DUMPER - PORT HEADLAND

CLIENT

FMG
EPCM - Worley Parsons

COMMENCEMENT

May 2011

COMPLETION

June 2012

PROJECT VALUE

56.0 Million

A Constructability WA case study: One of many successfully completed projects over our 35 year history in the Civil Construction Industry.

Scope of Works/ Contract Objective

- > The scope of works entailed the construction of the T45 Car Dumper- vault level, apron feeder level, trunion level, rail drive level, ingo and outgo foundations and double conveyor tunnels
- > The contract objective was to construct within budget and ahead of the approved baseline programme

Construction Quantities

- > 110 c/m blinding installed
- > 7504 sq/m setout of Structural formwork installed including false work and supports
- > 904 tonnes of reinforced steel installed
- > 5905 cu/m of structural concrete poured

Safety Performance

- > 25-40 personnel onsite during the project - 104,860 man hours
- > 1 lost time injury
- > 0 medically treated injury
- > Lost time injury frequency rate: 9.54

Environmental Performance

- > No environmental incidents reported
- > 10 Audits completed to 100% compliance

Project Challenges

- > Short duration for mobilisation to Site - 3 weeks
- > Craneage and Logistics - flexibility of sequence and program of works to align with client requirements
- > Wet season disruption to works progress on three separate occasions
- > Weather affected construction program impacting on-site with a greater interface with other contractors

Project Achievements

- > Contracted works completed 4 weeks ahead of schedule
- > Contracted works completed within the allocated budget
